## **FCC Determines No Violation of Auction Rules**

**McLean, Va. – April 25, 2008** – Today, Cyren Call Communications Corporation commented on the release of the Federal Communications Commission's (FCC) Inspector General's report pertaining to the auction of the 700 MHz D Block. Following a number of statements in the press and at the conclusion of the auction, the FCC's Office of Inspector General (OIG) opened an investigation to determine the truth surrounding certain accusations.

Importantly, the report stated that, "the OIG concluded that no FCC rules appear to have been violated and that no referral is warranted." Regarding whether Cyren Call's statements to potential bidders deterred bidding in the D Block, the report said, "This investigation has concluded that the lease payment estimates ... were informational in nature, were not made in bad faith and by themselves had no deleterious effect on the auction."

Morgan O'Brien, Chairman of Cyren Call Communications said, "Today closes the book on Auction 73. The release of the Inspector General's report is an encouraging sign that the FCC is moving forward to re-auction the D Block. Cyren Call will work closely with public safety, the bidder community, Congress and the FCC to make the re-auction of the D Block a success."

He added, "We cannot afford to take our collective sight off the critical task of solving our nation's public safety communications crisis."

### **About Cyren Call**

Founded in early 2006, Cyren Call is advisor to the Public Safety Spectrum Trust Corporation. Cyren Call is led by veterans of the wireless industry and public safety communications, who will assist the PSST in the creation of a nationwide, wireless broadband network that will carry priority public safety communications.
