Mr. Kevin J. Martin, Chairman
Federal Communications Commission
445 12th Street, S.W.
Room 8-B201
Washington, D. C. 20554

Dear Chairman Martin:

In my role as a deputy director for the Michigan Department of State Police, I am personally committed to the prevention of crime and dedicated to protecting the welfare of the citizens of Michigan. As such, I respectfully request that you urge the chairman of the Federal Communications Commission (FCC) to commence a Notice of Inquiry (NOI), enabling the public to review the Cyren Call Communications proposal and an opportunity to comment on it. This proposal would provide a nationwide, state-of-the-art wireless broadband network for public safety. Similar letters of request are being sent directly to Rep. John D. Dingell, Rep. Michael J. Rogers, and Rep. Fred Upton who, like you, have been unwavering supporters for public safety.

I am excited about the potential of this proposed long-term, privately funded interoperable network that supports next-generation technologies for public safety and for what it can bring to public safety communications. Public safety, in general, can only benefit from such a debate. While I certainly believe the Michigan State Police and each individual public safety entity will need to fully analyze the implications of such a valiant approach, the public safety community will have missed an enormous opportunity if this proposal is not debated in light of the severity of the state of national public safety communications.

Thank you in advance for your time and interest on this important matter. I look forward to hearing from you.

Sincerely,

THOMAS J. MILLER, LT. COLONEL
Deputy Director
Field Services Bureau
